

U.S. Lubricants introduces next generation THRIVE™ grease line

U.S. Lubricants has introduced its next generation of lithium-based greases employing environmentally friendly chemistries free of halogens and heavy metals.

THRIVE™ Multi-Purpose Lithium EP Grease is an excellent low cost solution for users across a wide range of industries with multiple and varied grease applications with moderate loads, pressures and temperature ranges. **THRIVE™ Multi-Purpose Lithium EP Grease** excellent flow properties at extremely low temperatures and provides strong antiwear protection, extreme pressure performance, rust and oxidation inhibition and high copper corrosion resistance.

THRIVE™ Hi Temp Lithium Complex EP Grease is a multi-purpose, high performance grease that minimizes wear under extreme pressure conditions in both Point and Line Contact applications, while exceeding GC-LB standards. It is compatible with most other greases and exhibits excellent pumpability and stay-in-place properties while effectively reducing wear, resisting water wash-out and water spray and preventing corrosion.

THRIVE™ Premium Moly EP Grease is intended for use in a wide variety of heavy-duty shock-loading applications. This lithium complex grease is fortified with 3% molybdenum disulfide solid lubricants that provide an added layer of insurance to protect against catastrophic failure should lubricant starvation occur. **THRIVE™ Premium Moly EP Grease** also provides excellent high temperature protection, resists water wash-out and water spray, and protects against corrosion.

In addition to the new **THRIVE™** greases, U.S. Lubricants distributes **BioBlend's BioGrease** environmentally friendly grease line as well as **Steward** calcium sulfonate greases and the **ConocoPhillips** grease line, an extensive range of solutions for users in industrial, heavy duty/commercial and automotive applications.

U.S. Lubricants is a leading lubrication solutions provider to the industrial manufacturing, metalworking, and commercial and passenger car transportation sectors. The company's products and services portfolio includes a comprehensive range of lubricants, fluid storage and handling systems, filtration systems, predictive analysis tools and services, and more; all expertly woven into customized solutions that help customers maximize reliability and uptime and assure the health and long life of manufacturing machinery, engines, transmissions and other mechanical systems across a wide range of applications and industries.

*U.S. Lubricants is a division of **U.S. Venture**, a privately held, \$9+ billion leader in the distribution and marketing of fuels, tires and parts, lubricants and other products consumed by vehicles.*
